

Intern Opportunities with PSU student start-up

Mod Zero is a tech-based startup in the **defense / firearms** industries with a product that revolutionizes the way scopes are used on rifles. Our patent-pending technology ends the hassle of repeatedly aligning scopes to rifles. Mod Zero users can easily swap scopes between rifles, reducing the costs of duplicate scopes. With product design complete and preproduction manufacturing underway, we are expanding our team in preparation for our public launch via an **INDIEGOGO** campaign in May 2017. All of the following positions are guaranteed for the rest of the spring semester, with compensation based on a percentage of the profits from the campaign. **More campaign success = more \$\$\$**. Positions are **flexible to applicant's experience and interests**. Strong preference towards applicants with firearms experience.

Role	Engineering Intern
Hours / Week	10-20
Tasks	<ul style="list-style-type: none">• Product Development & Manufacturing• Ballistic adjustment modeling
Skills	<ul style="list-style-type: none">• CAD (Autodesk)• CNC Machining• Matlab or equivalent• Rapid Prototyping
