

## ***Software Development Summer Internship***

**Visionese** is a 360° virtual tour start-up company that creates the next-generation of online immersive and interactive tour. Our team of knowledgeable consultants work to create visually stunning tours that best showcase physical spaces and create connections with viewers. We work out of Happy Valley Launchbox in downtown State College.

### **Description**

A Software Developer intern at Visionese is someone who will have real tasks and get real experience in a startup. Assist in the development of our website into a tool to inform and recruit potential customers.

### **Job Duty**

Software Development interns will assist in design, installation, testing and maintenance of Virtual tour development software system.

### **Experience**

Experience in JAVA, JavaScript, JQuery, Python, C++, XML, HTML or CSS are preferred.

### **Time Requirement**

20-25 hours per week.

### **Location**

Downtown State College, PA
