

Reflexion Interactive Technologies LLC

Reflexion provides fast, portable, and affordable concussion monitoring systems to amateur athletic organizations to improve athlete safety.

We are looking for software development interns.

Interns will work together and with our founding team to develop applications to control our Reflexion Edge system.

Skills we are looking for include C, C++, Java, Python, Django, SQL, HTML, JavaScript, or anything else you might bring to the table.

Mobile application design experience is a plus.

Give us a call or shoot us an email.

Scan the QR code to fill out our application..
