

"The Innovative Way to See the World."

Visionese is a 360 virtual tour company that combines panoramic and aerial drone photography to deliver the next-generation of online immersive and interactive tour. Our team of knowledgeable consultants work to create visually stunning customized tours that best showcase physical spaces and create connections with viewers. We work out of Happy Valley Launchbox in downtown State College.

Description: A Web Design intern at Visionese is someone who will have real tasks and get real experience in a startup. Assist in the development of our website into a tool to inform and recruit potential customers.

Job Duty: Web Design interns will assist our CTO in the front end and back end of our website development. Also test our existing website in order to better design our next.

Experience: Experience in HTML, JavaScript, or CSS are preferred.
